Target Role: Business Development Representative, Anthropic — Seoul

PROFILE

Business Development professional with 12+ years driving global payment and platform partnerships, now combining that operator background with hands-on AI/LLM building. At NHN KCP's International Business team, I owned end-to-end deal cycles — prospecting through contracting and renewals — with 10+ global partners including Visa Cybersource, Tencent, JP Morgan, and WorldPay, giving me deep fluency in **consumption-based, transaction-priced B2B models**. I have a documented 0 → 1 outbound BD case where I built a cross-border USD remittance service from scratch and generated **KRW 200M+ in monthly recurring revenue**.

Currently leading BizOps at Toomics Global, I personally drive BD and contract negotiations with global payment partners (**PayPal, Checkout.com, WorldPay, Airwallex**) and IP-protection partners (**Markvision** and others), while simultaneously designing and shipping a **Claude API-based AI Agent pipeline** that automated our reporting from 48h → 1h (95% reduction) and cut FRT/RT by 50%+. I use SQL and Python daily to turn operational and partner data into sales-relevant insights, and 4.5 years stationed in Bangkok at a tri-national joint venture sharpened my cross-cultural execution. I'm bilingual at business-native level in **Korean and English**, and I deeply care about Anthropic's mission of building safe, reliable AI.

KEY HIGHLIGHTS (BDR-FIT)

- **Outbound BD 0 → 1:** Conceived and launched a cross-border USD remittance service generating **KRW 200M+ monthly recurring revenue** (NHN KCP)
- **Active Global BD (Current):** Personally leading BD with PayPal, Checkout.com, WorldPay, Airwallex, and Markvision at Toomics Global today
- **Strategic Account Ownership:** Managed full deal cycle for **10+ global partners** — Visa Cybersource, Tencent, JP Morgan, WorldPay
- **Native fluency in consumption-based API economics:** 12 years operating PG / payment infrastructure — the closest analogue to Anthropic's per-token pricing model
- **Hands-on AI/LLM builder:** Built production AI Agent on Claude API (95% reporting-time reduction)
- **Data → Insight:** Analyzed 1,500+ multilingual tickets/month to drive **52% FRT** and **57% RT** reductions
- **Fluent Bilingual:** English (Bachelor's at ANU Australia + 4.5 years Bangkok) · Korean (Native)

EXPERIENCE

Toomics Global

Team Lead, BizOps (Global Platform Operations) | Jun 2024 ~ Present

Own payments, CX, and IP across 10 international markets while managing a team of 4. Personally lead BD with global payment and IP partners and use data + AI to compress decision-cycle time.

- **[Active Payment BD]** Personally prospect, meet, and negotiate with global PSPs — **PayPal, Checkout.com, WorldPay, Airwallex** — leading new and renewal contracts. Drive market-by-market coverage expansion and fee-structure optimization in parallel; consolidated chargeback dispute and refund flows across three PSPs into one automated workflow.
 - **[IP / Anti-Piracy Partnership]** Lead BD and contracting with **Markvision** and other global IP-protection vendors. Built a DMCA / UDRP-based piracy monitoring and takedown framework, establishing a partner ecosystem that pre-empts brand and revenue risk.
 - **[Data-driven Insights]** Designed and built a Claude API-based AI Agent pipeline end-to-end, automating raw Zendesk data → weekly KPI reports. Cut reporting cycle time **48h → 1h (95% ↓)** and embedded a data-driven operating cadence.
 - **[Lead / Ticket Triage at Scale]** Restructured 1,500+ monthly multilingual (10-language) inbound tickets into 17 categories and 80+ response templates with prioritized queues; drove **FRT down 52%** and **RT down 57%** through repeating-pattern analysis.
 - **[Process Refinement]** Established Confluence-based ops playbooks and a GitHub-versioned automation governance, scaling AI automation in phases (manual → semi-auto → full-auto) to control change-management risk.
-

NX3 Games

Lead, Blockchain Business | Jan 2022 ~ Nov 2023

Owned the new blockchain-game business end-to-end — product strategy, partnerships, payment integrations, and fundraising — in a fast-moving startup environment.

- **[Strategic Outbound · Investor Relations]** Led the Seed round, ran outbound meetings and pitches to VCs and strategic partners, **closing 100% of the allocated round**. Delivered numerous English-language presentations to C-level and investor audiences.
 - **[Cross-functional Pipeline Build]** Sourced, contracted, and integrated multi-channel payment partners — Xsolla (PC in-app) and Binance Pay (web blockchain) — aligning engineering, business, and operations stakeholders to launch on schedule.
 - **[Product GTM]** Designed NFT, token, and P2E mechanics for the MMORPG "Rohan M" and shipped the global blockchain version in Jan 2023.
-

NHN KCP

Lead, International Business Team | Nov 2019 ~ Dec 2021

Owned global payment-partner ecosystem sales, contracts, and operations. Ran the full **consumption-based, transaction-priced B2B** lifecycle: prospecting → qualification → closing → expansion.

- **[New Business Development 0 → 1]** Conceived and launched a USD virtual-account-based cross-border bulk remittance service, generating **KRW 200M+ in monthly recurring revenue**. Owned the full E2E: problem definition (offshore-settlement inefficiency) → market discovery → partner negotiation (Payoneer, Uber, Airbnb) → launch → KPI measurement.
 - **[Strategic Account Sales · Expansion]** Owned account ownership across **10+ global payment partners** — Visa Cybersource, Tencent, JP Morgan, WorldPay — running deal negotiation, fee renegotiation, and cross-sell. Improved partner experience and revenue efficiency together.
 - **[Outbound Partnership]** Drove a strategic partnership with Tencent to launch offline WeChat QR payment in the Korean market.
-

Treepay Co., Ltd (JV: NHN KCP × CAT Telecom × SK Telecom)

IT Director / Team Lead | Jun 2015 ~ Nov 2019 | Bangkok, Thailand

Founding-team member at the tri-national JV, stationed in Bangkok for 4.5 years. Combined 0 → 1 payment-infrastructure build with cross-cultural BD/Ops.

- **[Cross-cultural BD]** Designed Thailand-specific payment business models (cards/installments, e-Wallet, Counter Payment) and ran sales/partnership execution with local financial institutions, security vendors, and law firms. Three-country (Korea, Thailand, Australia) stakeholder communication in English.
 - **[Regulatory & Licensing]** Led acquisition of payment licenses (C3 / C5), PCI-DSS, and BOT regulatory approvals — running the end-to-end business setup under local regulation.
 - **[Process Innovation]** Re-architected Korea's three-party payment model to fit Thailand's four-party local standard and ran the in-housing consulting through to operational handover.
-

NHN KCP

Account Manager, International Business Team | Oct 2014 ~ Jun 2015

- **[Account Management]** Owned account management for Visa-subsiary Cybersource and downstream merchants — global OTAs, fashion brands, and digital platforms — as primary point of contact.
 - **[Data-driven Optimization]** Onboarded Cybersource FDS into NHN KCP's overseas-card processing and continuously tuned detection rules with data, scaling monthly successful overseas-card transactions from **~10K** → **~80K (8×)**.
-

EDUCATION

Australian National University | Canberra, Australia Bachelor of Commerce, Major in Finance | 2007 ~ 2012

SKILLS & QUALIFICATIONS

AI / LLM (Builder Level)	Claude API, Prompt Engineering, AI Agent pipeline design, RAG fundamentals
Domain	Consumption-based B2B (PG / Payments), Cross-border Payment, Partnership & Contract Negotiation, 0 → 1 GTM, Data-driven Operating Governance
Military	Republic of Korea Army, Sergeant, honorable discharge (Oct 2012 ~ Jul 2014)

WHY ANTHROPIC

- **Mission alignment:** A career running global payment infrastructure trains you to think in terms of trust, risk, and compliance every day. Anthropic's commitment to safe, interpretable AI maps directly onto those values.
- **Builder-operator perspective:** I've shipped production automation on the Claude API myself, so I can speak the language of evaluating-stage startup and enterprise prospects and accelerate their journey from curiosity to deployment.
- **APAC GTM fit:** 0 → 1 BD and operations across Korea, Thailand, and Australia gives me coverage of both fast pipeline-build motions and complex enterprise account dynamics in this market.
